APPENDIX H

PROJECTILE POINT PHOTOGRAPHS

All of the points used in the analyses in the main text of the Hickory Bluff document are illustrated in this appendix in order to show the range of variation within the type designations employed. As this appendix is intended as a reference tool, the images are presented in alphabetical order by type. Points that did not conform to accepted regional type definitions are displayed at the end of the appendix, grouped by the general morphological design attributes used in the main text.
