South District Modified Edge Paving Contracts
May-26

Description: Each side of an existing tar and chip roadway is paved with hot mix asphalt to improve rideability. There is a gap of about 2 feet left at the centerline to keep the existing grade. After a period of weeks, the roadway is tar and chipped and then a fog seal is applied. At the end of all three processes, the roadway is uniform and preserved.

Road Number	Road Name	From	To	Status		
				Wedged	Tar & Chipped	Fog Sealed
